

MOHAMED MAGAROOS N

Pondicherry, India | 9566977112 | magaroos45@gmail.com | www.linkedin.com/in/mohamed-magaroos | <https://github.com/Magaroos>

PROFESSIONAL SUMMARY

MCA graduate and full-stack developer with hands-on experience building secure, production-style web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js). Skilled in REST API design, JWT authentication, AES-256 encryption, and AI-integrated features. Delivered two end-to-end applications (Encrova, Lifelink) and completed a software development internship applying Agile collaboration, Git workflows, and code review practices. CGPA 8.27/10. Seeking a Software Developer role to build reliable, secure, and scalable software.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), Python
- **Frontend:** React.js, Tailwind CSS
- **Backend:** Node.js, Express.js, REST API Design, JWT Authentication
- **Database:** MongoDB
- **Tools & Practices:** Git, GitHub, Postman, VS Code
- **Cloud/APIs:** Cloudinary, Groq AI API, Google Gemini AI integration

PROJECTS

Encrova — Secure Cloud-Based File Sharing Platform

React.js, Node.js, Express.js, MongoDB, JWT, AES-256, Groq AI API, Cloudinary, Tailwind CSS

- Built a full-stack MERN application for encrypted, access-controlled file sharing, applying AES-256 encryption to files before cloud storage to protect data at rest.
- Implemented JWT authentication with role-based access control to enforce secure, permission-based access to files and API routes.
- Integrated Google Gemini AI to analyze password strength in real time and guide users toward stronger sharing passwords.
- Engineered password-protected sharing, one-time downloads, automatic file expiration, and activity logging to strengthen data-loss prevention.
- Designed RESTful APIs and MongoDB schemas for user data, file metadata, and sharing history; integrated Cloudinary for encrypted file storage.

Lifelink — Blood Donation Management System

React.js, Node.js, Express.js, MongoDB, JWT, REST APIs

- Developed a full-stack platform connecting blood donors and recipients to streamline donor discovery and request handling.
- Implemented JWT-based authentication and role-based access control for secure registration, login, and protected-resource access.
- Built RESTful APIs for donor search and blood-group filtering, enabling recipients to quickly locate compatible donors.
- Designed responsive interfaces for donor registration, request management, dashboards, and profile management.

EXPERIENCE

Software Development Intern

Mar 2026 – May 2026

Agile Soft Labs

- Developed and maintained web application features using the MERN stack as part of a production codebase.
- Collaborated with a cross-functional development team in an Agile workflow to implement responsive UIs and backend functionality.
- Worked with REST APIs, debugging, testing, and code optimization to improve feature reliability.

EDUCATION

Master of Computer Applications (MCA)

2024 – 2026

Christ College of Engineering and Technology, Pondicherry University | CGPA: 8.27/10

Bachelor of Computer Applications (BCA)

2021 – 2024

Indira Gandhi College of Arts and Science, Pondicherry University | CGPA: 6.26/10

HSC (12th Standard) — State Board, 77%

2020

SSLC (10th Standard) — State Board, 63%

2018

CERTIFICATIONS

- Web Development — Udemy
- The Joy of Computing Using Python — NPTEL

SOFT SKILLS

Problem Solving, Communication, Teamwork, Adaptability, Time Management

LANGUAGES

English, Tamil
